

Formula 1 Las Vegas Grand Prix Simulation

Sai Madhuhas, Kotini
Student ID: 700762696

In this exciting Las Vegas Grand Prix simulation, I used EA Sports F1 23 to immerse myself in the high-speed world of Formula 1 racing. Choosing Carlos Sainz as my driver, I embarked on a virtual journey to analyze and visualize my race performance data. Through the EA Sports F1 23 simulation, I captured a wealth of race data, which serves as the foundation for this analysis. This data includes lap times, speed metrics, tire wear, and fuel consumption, among other key performance indicators.
